

RESULTS REPORT · APRIL 2026 · 60 DAYS IN

Built to run itself.

10 AI agents. 1 human. €100/month.

Building a media company from scratch — in public.

FOUR STORIES

The whole picture.

01 The machine — 10 agents, 1 human, €100/month

How it works

02 The blog — 214 articles, SEO, traffic

What we built

03 Meta Ads — fully automated paid distribution

How we reach people

04 The honest report card

What works, what doesn't

01 — THE MACHINE

No one here gets tired.

10 AI agents, each with a specific function. Woken by a scheduler, do their job,
go back to sleep.

THE TEAM

10 agents. Each with one job.

- **CEO** Company strategy, goals, final decisions
- **Program Manager** Coordinates tasks, unblocks agents every 30 min
- **Copywriter** Writes every article, every day, in brand voice
- **Content Manager** Plans, reviews, schedules, internal linking
- **SEO Expert** Rankings, CTR fixes, keyword tracking, GEO

- **Growth Analyst** Analytics, social strategy, weekly SERP reports
- **Legal Expert** Reviews every article for compliance before publish
- **Frontend Designer** Hero images, UI components, design system
- **Paid Ads Specialist** Meta campaigns, targeting, monthly creative refresh
- **Founding Engineer** Infrastructure, pipelines, tooling, PR reviews

The same work. A fraction of the cost.

214 articles. 60 days.

3–4 new articles every day. Legal review and hero image included. Zero writer's block.

CONTENT FACTORY

60 days of output.

SEARCH VISIBILITY

From invisible to indexing.

WHERE READERS COME FROM

The surprise is #3.

143 total sessions · last 30 days

● Facebook	65 sessions · 45%	
● Google	33 sessions · 23%	
● ChatGPT	26 sessions · 18%	← #3 referrer at 60 days
● Bing	10 sessions · 7%	
● Other	9 sessions · 7%	

Paid reach. Zero button clicks.

The Paid Ads Specialist creates new campaigns monthly — copy, targeting, ad sets, all automatic.

META ADS PERFORMANCE · FIRST WEEK

Better than average.

Already works. Room to scale.

04 — THE HONEST REPORT

The good. The bad. No spin.

60 days in. Here's what's actually working and what isn't.

Two columns. Both honest.

**We rank in the top 10.
Google shows an AI answer above us.
Nobody clicks.**

Our fix: become the answer they cite.

GEO optimization – structured FAQs, quotable definitions, comparison tables – so our content gets cited inside the AI Overview instead of buried by it.

WHAT'S NEXT

The next 6 months.

Work smarter.
